Instructions for Breeding Bird Form

Fill in the County, compiler, and year at the top of the form

Fill in the appropriate breeding code in the Code column. The codes are as follows.

PO - Possible. The species is present in suitable habitat during the primary breeding period for the species in your county

PR - Probable. The species meets the “Possible” criteria and at least one of the following:

- Agitated behavior or anxiety calls
- Pair seen
- Bird holding territory
- Courtship or copulation
- Visiting probable nest site
- Nest building by wrens or woodpeckers

CO - Confirmed. The species meets at least one of these criteria:

- Distraction Display
- Nest building
- Used nest
- Recently fledged young
- Parent with fecal sac
- Parent with food for young
- Adult entering/leaving nest site
- Nest with eggs
- Nest with young
- Physiological evidence (Banders only)

The “Breeding Season” starts in February (Great Horned Owls) and ends sometime in the fall (Sedge Wrens, Goldfinch, Barn Owls). There are no specific start and end dates.

Special Instructions for filling in the spreadsheet version of the report form

1. There are two versions of the form. **BreedingBirdForm.WB3** is in Quattro Pro format (preferred) and **BreedingBirdForm.xls** is in Microsoft Excel format.
2. **DO NOT add or delete any rows** on the spreadsheet. This is so Wendy can copy and paste the data intact and it will match her species list by row.
3. Enter the codes in uppercase (capitalized). Ie. PO, PR or CO.
4. Save the spreadsheet as Breeding(year)(county). Ie. Breeding2002York, Breeding2003Indiana, etc.
5. Email as an attachment to: **pabirdsrus@zoominternet.net**
