This form should be completed and submitted with your fall season report. Due December 31.

Send to: **Wendy Jo Shemansky, 41 Walkertown Hill Rd, Daisytown, PA 15427** or pabirdsrus@zoominternet.net

Instructions for Fall Migrant Form

Fill in the County, compiler, and year at the top of the form

For migrant species which **do not** breed in your county, enter the earliest date each species was seen in the "First Date" column.

For species which breed in your county, enter the last date seen in the "Last Date" column.

For migrant species which do not winter in your county, enter the last date seen in the "Last Date" column.

For migrant species which do winter in your county, enter the first date seen in the "First Date" column

Therefore:

Non-wintering Breeders will have only a "Last Date" (ie. Yellow Warbler)

Non-breeding wintering birds will have only a "First Date" (ie. Northern Shrike, Evening Grosbeak)

Transient migrants will have both (ie. Connecticut Warbler)

Date should be entered as MM/DD. ie. April 5 would be entered as 4/5, May 26 would be entered as 5/25, etc.

(Do not enter the year. Do not spell out the month. Do not use Mid-Sep, etc.)

The "Fall" Migration starts in July (Shorebirds, Orchard Orioles, etc.) and ends in December. There are no specific start and end dates.

Special Instructions for filling in the spreadsheet version of the report form

1. There are two versions of the form. **FallMigrantForm.QPW** is in Quattro Pro format (preferred) and **FallMigrantForm.xls** is in Microsoft Excel format.
2. **DO NOT add or delete any rows** on the spreadsheet. This is so Wendy can copy and paste the data intact and it will match her species list by row..
3. Enter the dates as shown above. (ie. 4/5, 5/26, etc.) The cells are already formatted, but if they lose their format, re-format them to Short International Date. (ie. MM/YY)
4. Save the spreadsheet as Fall(year)(county). Ie. Fall2002York, Fall2003Indiana, etc.
5. Email as an attachment to: **pabirdsrus@zoominternet.net**
